

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	18 June 2026
Name	Dhanish Ladwani
Project Name	ShopEZ - E-Commerce Application
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration & Login	USN-1	As a user, I can register for the application by entering my username, email, and password.	2	High	
Sprint-1		USN-2	As a user, I can log into the application by entering my registered email & password.	1	High	
Sprint-1		USN-3	As a user, I will receive a JWT token upon successful login to maintain my authenticated session.	1	High	
Sprint-1	Product Catalog	USN-4	As a user, I can browse all available products with images, titles, prices, and discount percentages.	2	High	
Sprint-1		USN-5	As a user, I can filter products by gender (men/women/unisex/kids) and by category.	2	High	
Sprint-2		USN-6	As a user, I can search products in real-time by entering a keyword in the search bar.	2	Medium	
Sprint-2		USN-7	As a user, I can sort products by price (low-to-high / high-to-low) and by discount percentage.	1	Medium	
Sprint-2	Shopping Cart	USN-8	As a user, I can add a product with a selected size to my shopping cart.	2	High	
Sprint-2		USN-9	As a user, I can view my cart with all items, quantities, prices, and a running total.	2	High	
Sprint-2		USN-10	As a user, I can update the quantity of items in my cart or remove items from my cart.	2	High	
Sprint-3	Order Management	USN-11	As a user, I can place an order by providing my delivery address, mobile number, and payment method (COD / online).	3	High	
Sprint-3		USN-12	As a user, I can view my complete order history with order status and expected delivery date.	2	High	

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-3	User Profile	USN-13	As a user, I can view and update my profile information (username, email).	2	Medium	
Sprint-3	Admin Dashboard	USN-14	As an admin, I can view an analytics dashboard showing monthly revenue, order distribution, user stats, and best-selling products.	3	High	
Sprint-4	Admin Products	USN-15	As an admin, I can create a new product by filling a form with title, description, images, sizes, category, gender, price, and discount.	3	High	
Sprint-4		USN-16	As an admin, I can edit or delete existing products from the catalog.	2	High	
Sprint-4	Admin Orders	USN-17	As an admin, I can view all customer orders and update each order status (order placed / processing / shipped / delivered / cancelled).	3	High	
Sprint-4	Admin Users	USN-18	As an admin, I can view all registered user profiles and delete a user account.	2	Medium	
Sprint-4	Security	USN-19	As a developer, I have implemented Helmet, rate limiting, CORS, and response compression on the Express server.	2	High	

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	5 Days	01 Jun 2026	05 Jun 2026	20	05 Jun 2026
Sprint-2	20	4 Days	06 Jun 2026	09 Jun 2026	20	09 Jun 2026
Sprint-3	20	4 Days	10 Jun 2026	13 Jun 2026	20	13 Jun 2026
Sprint-4	20	5 Days	14 Jun 2026	18 Jun 2026	20	18 Jun 2026

Velocity:

For ShopEZ, we have a 5-day sprint duration (Sprint-1 and Sprint-4) and 4-day duration (Sprint-2 and Sprint-3), with each sprint targeting 20 story points. The total project spans 18 days (01 Jun 2026 to 18 Jun 2026) across 4 sprints.

Average Velocity (AV) = Total Story Points Completed / Number of Sprints

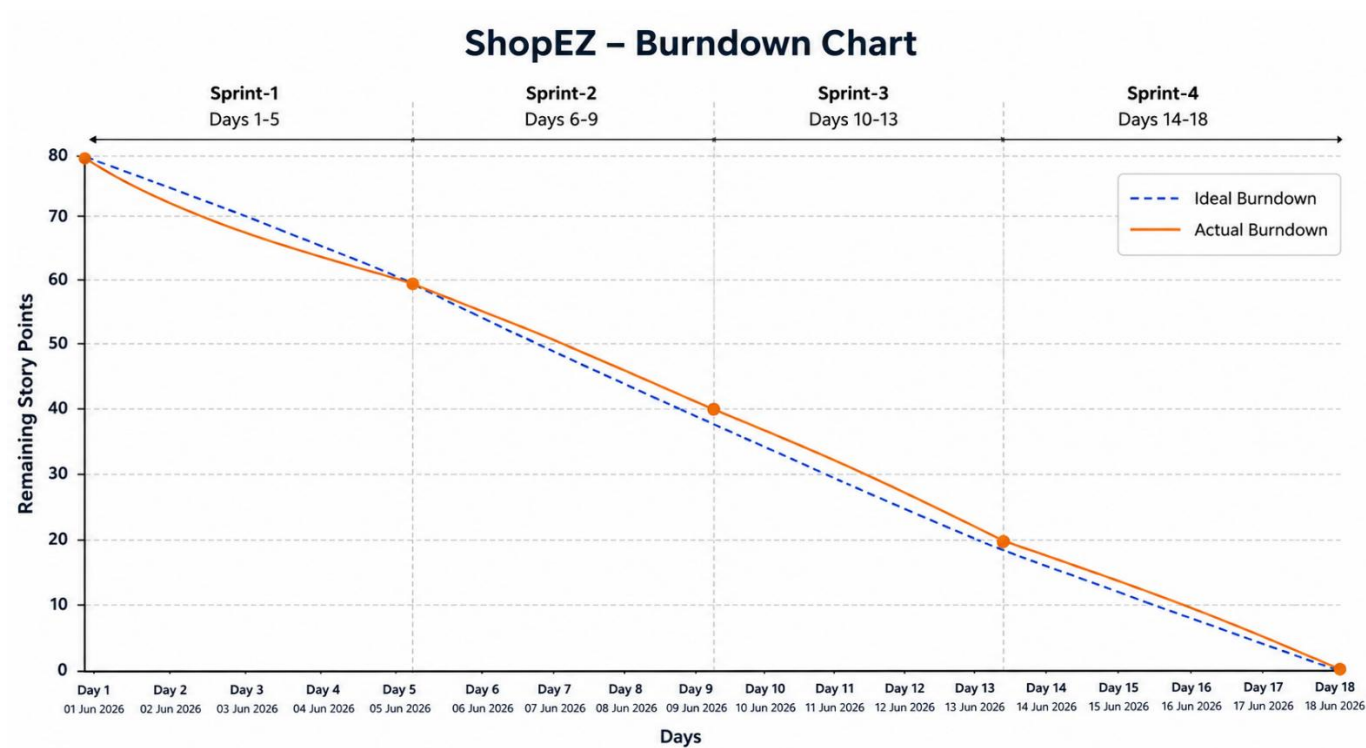

AV = 80 story points / 4 sprints = 20 story points per sprint

Story Points per Day (Sprint-1 & Sprint-4) = 20 / 5 = 4.0 story points per day

Story Points per Day (Sprint-2 & Sprint-3) = 20 / 4 = 5.0 story points per day

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
