Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - <i>who are they?</i>	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - <i>what are they trying to achieve?</i>	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - <i>what bothers them most?</i>	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - <i>what needs to be solved?</i>	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - <i>how does it impact them emotionally?</i>	Describe the emotions the result from experiencing the problems or barriers

Example:

I am a traveler	I'm trying to book flights on my phone	But it takes a long time	Because The website is not responsive and doesn't have a mobile version	which makes me feel Frustrated
------------------------	---	---------------------------------	--	---------------------------------------

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a busy online shopper browsing ShopEZ for clothing, footwear, and accessories on my phone	quickly find products I like, check if they're worth buying, and complete my purchase with confidence	most store sites make me dig through cluttered pages with no real filters, no visible ratings, and a clunky cart that loses items or doesn't show order status	many e-commerce front-ends are built as static catalogs without real search/filter logic, live cart sync with the backend, or a transparent order-tracking flow	frustrated and hesitant to buy, unsure whether the order will actually go through or arrive as expected
PS-2	a store admin running the ShopEZ catalog, who needs to publish products and keep orders moving without a developer's help	add new products quickly, see how the business is performing, and fulfill customer orders on time	most off-the-shelf platforms either lock product management behind expensive plugins or give no real visibility into revenue, order status, or which products are actually selling	most lightweight store builders skip a dedicated admin dashboard with analytics, role-based access control, and order-status management built directly into the product	overwhelmed and disconnected from the day-to-day health of the store
