

Project Design Phase-II

Data Flow Diagram & User Stories

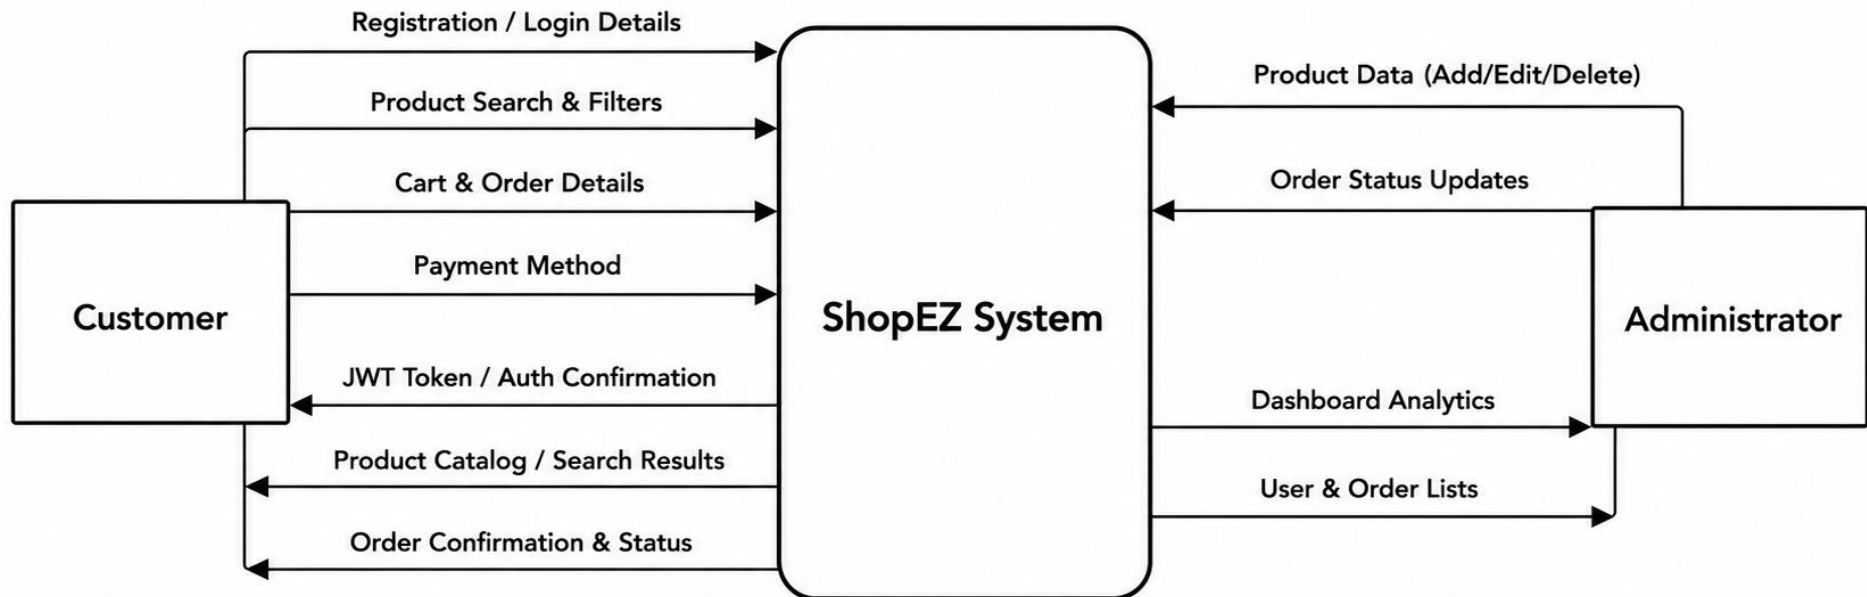

Date	18 June 2026
Name	Dhanish Ladwani
Project Name	ShopEZ - E-Commerce Application
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

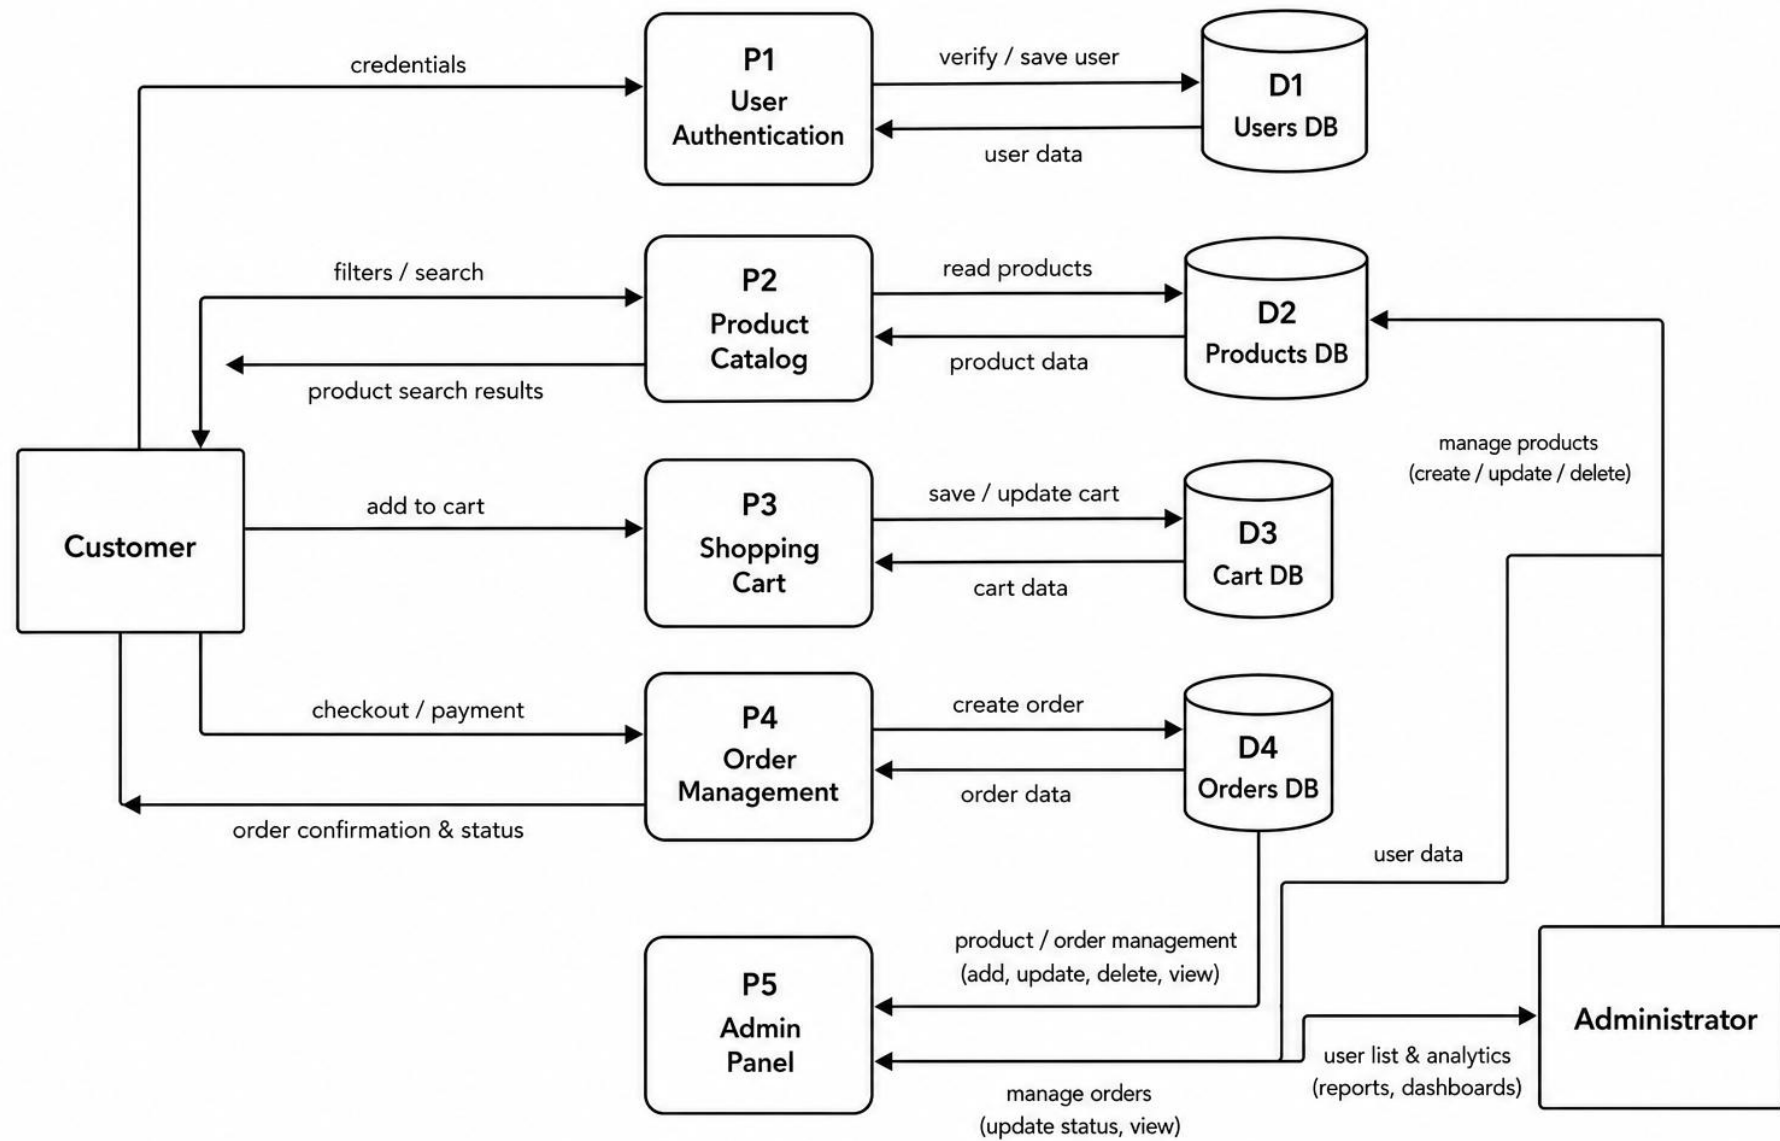

Level 0 DFD (Context Diagram):

The Level 0 DFD shows ShopEZ as a single process. External entities (Customer and Administrator) interact with the system by sending and receiving data.

Level 1 DFD:

The Level 1 DFD expands the ShopEZ system into its main sub-processes, showing how data flows between them and the data stores.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Web User)	Registration	USN-1	As a user, I can register by entering my username, email, and password to create a new account.	I can access my account and the home page after successful registration.	High	Sprint-1
		USN-2	As a user, I can log into the application by entering my registered email & password.	I am redirected to the home page with my session active after login.	High	Sprint-1
		USN-3	As a user, I will receive a JWT token upon successful login to maintain my authenticated session.	My session persists across page refreshes without re-logging in.	High	Sprint-1
	Product Catalog	USN-4	As a user, I can browse all products on the catalog page with images, titles, prices, and discount percentages.	All products load correctly with their image, title, price, and discount displayed.	High	Sprint-1
		USN-5	As a user, I can filter products by gender (men / women / unisex / kids) and by category.	Only products matching the selected gender and category are shown.	High	Sprint-1
		USN-6	As a user, I can search products in real-time by entering a keyword in the search bar.	Product list updates instantly as I type, showing only matching titles.	Medium	Sprint-2
		USN-7	As a user, I can sort products by price (low-to-high / high-to-low) and by discount percentage.	Products reorder correctly according to the selected sort option.	Medium	Sprint-2
	Shopping Cart	USN-8	As a user, I can add a product with a selected size to my shopping cart.	The item appears in my cart with the correct size, price, and quantity.	High	Sprint-2
		USN-9	As a user, I can view my cart showing all items, quantities, individual prices, and the total amount.	Cart displays all added items with accurate totals and a checkout button.	High	Sprint-2
		USN-10	As a user, I can update item quantities or remove items from my cart.	Cart total recalculates correctly after any update or removal.	High	Sprint-2

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
	Order Management	USN-11	As a user, I can place an order by providing my delivery address, mobile number, pincode, and payment method (COD / online).	Order is created and I see a confirmation with my order details and expected delivery date.	High	Sprint-3
		USN-12	As a user, I can view my complete order history with item details, order status, and expected delivery date.	All my past and current orders are listed with correct status and dates.	High	Sprint-3
	User Profile	USN-13	As a user, I can view and update my profile information (username, email).	Profile updates are saved and reflected immediately on the profile page.	Medium	Sprint-3
Administrator	Admin Dashboard	USN-14	As an admin, I can view an analytics dashboard showing monthly revenue, order distribution, user registration stats, and best-selling products.	Dashboard loads with accurate charts and metrics reflecting current database data.	High	Sprint-3
		USN-15	As an admin, I can see an overview of total revenue, total orders, total users, and total products at a glance.	All summary cards display correct real-time counts and values.	Medium	Sprint-3
	Product Management	USN-16	As an admin, I can create a new product by filling a form with title, description, images, sizes, category, gender, price, and discount.	New product appears immediately in the catalog after submission.	High	Sprint-4
		USN-17	As an admin, I can edit the details of an existing product.	Updated product details are saved and visible in the catalog.	High	Sprint-4
		USN-18	As an admin, I can delete a product from the catalog.	Deleted product no longer appears in the catalog or search results.	High	Sprint-4
	Order Management	USN-19	As an admin, I can view all customer orders and update each order status (order placed / processing / shipped / delivered / cancelled).	Order status is updated in real-time and the customer can see the new status.	High	Sprint-4
	User Management	USN-20	As an admin, I can view all registered user profiles.	A complete list of all registered users is displayed with their details.	Medium	Sprint-4
		USN-21	As an admin, I can delete a user account.	Deleted user can no longer log in and their data is removed.	Medium	Sprint-4
